

# ENVIRONMENTAL POLICY

Our **mission** is to concentrate in a single point all logistics needs with a flexible, trustful service.

Our **vision** is committed to improving the logistics sector, making us a benchmark brand, dedicating our efforts to creativity and innovation, value and respect for our people.

Our activity includes all those related to the activities of a **transport agency**, offering road freight transport services at national and international level.

We consider that the development of the operations of **ALIANZA LOGISTICS** must be compatible with **Sustainable Development and Social Responsibility** principles towards our that guarantee an adequate management and protection of both our resources and the environment and respond to societal concerns.

We are committed to complying with and enforcing the following principles, which constitute our environmental policy:

- ✓ Considering the **environmental** variable in the **planning and development of our activities**, promoting environmental awareness among our personnel, suppliers and society in general.
- ✓ Complying with the **environmental legislation** applicable to our activities, as well as other commitments that may be established, striving to prevent pollution and minimising the environmental impact we generate as far as possible.
- ✓ Developing a **continuous effort of improvement** within the framework of our **Management System** that allows us to improve its effectiveness and to be more efficient in the consumption of resources.
- ✓ **Minimising** the following **environmental impacts** of our direct activity:
  - Consumption of **energy** from non-renewable sources.
  - Atmospheric pollution: **greenhouse gas emissions** in particular.
  - **Water** consumption.
  - Consumption of **hazardous chemicals**.
  - **Waste** generation, both hazardous and non-hazardous.
- ✓ **Actively promoting the reduction of our main impact**, atmospheric pollution through greenhouse gas emissions, **on employees, customers and society in general**.
- ✓ Promoting the **responsible consumption** of products among our workforce and stakeholders.
- ✓ Ensuring the **dissemination** of this **policy** among all our employees and society, by establishing a policy of fluid communication with the authorities, local communities and stakeholders.
