

SUSTAINABLE PROCUREMENT POLICY

Our **mission** is to concentrate in a single point all logistics needs with a flexible, trustful service.

Our **vision** is committed to improving the logistics sector, making us a benchmark brand, dedicating our efforts to creativity and innovation, value and respect for our people.

Our activity includes all those related to the activities of a **transport agency**, offering road freight transport services at national and international level.

We consider that the development of the operations of **ALIANZA LOGISTICS** must be compatible with **Sustainable Development and Social Responsibility** principles towards our that guarantee an adequate management and protection of both our resources and the environment and respond to societal concerns.

We are committed to complying with and enforcing the following principles, which constitute our sustainable procurement policy:

- ✓ **Adoption of social and environmental sustainability criteria** into our economic-financial policies regarding the **procurement of goods and services** by ALIANZA LOGISTICS in order to align sustainable procurement with the company's financial and operational objectives.
- ✓ **Efficiency in the use of resources**, minimising the need to purchase goods and contracting services, following the principles of reducing, reusing and recycling them.
- ✓ **Planning the acquisition of goods and services** as an essential instrument for sustainable development.
- ✓ Promoting **training and awareness** in ethics, compliance and sustainability issues for both employees and suppliers, and encouraging them to pass this commitment on to their supply chain.
- ✓ Development of environmental, economic and social **awareness campaigns**.
- ✓ Creating business relationships based on mutual respect and **selecting suppliers, products and services** according to the **criteria of sustainability, quality and social responsibility**.
- ✓ Providing clear information on the conditions of participation and evaluation criteria and creating **equal and transparent** conditions for the selection of suppliers based on objective, transparent and balanced criteria.
- ✓ Guaranteeing **appropriate market conditions** for the services provided by suppliers.
- ✓ Ensuring timely, clear and truthful information to suppliers on matters of interest to them via an **approachable communication system**.
- ✓ **Total condemnation** of any practice contrary to any sustainable management issues (environmental, social or economic) detected in the supply chain.
- ✓ Demanding a high level of business ethics and **respect for both human and labour laws** from all suppliers and contractors in the supply chain (freedom of association and effective recognition of the right to collective bargaining, elimination of all types of forced or compulsory labour, eradication of child labour, abolition of discrimination in employment and occupation, responsible labour contracting, legal and consistent working hours and remuneration, as well as the occupational health and safety of their workers).
